Reset Family Access/Skyward Password

Go to Bethelsd.org on a web browser (Safari) and select Family Access the top navigation bar.

Tap the Forgot your Login/Password.
Tap the box next to ‘I’m not a robot’ and complete picture verification if prompted.

Enter the student’s email (student#@students.bethelsd.org).

Tap submit.

Once submitted, a popup window should show stating an email has been sent to the student’s school account.
Go to the student’s **school email** and wait for an email from do.not.reply@bethelsd.org. Once received, open it and select the link provided.
The link will take the student to a password reset webpage. Have the student enter a new password, enter the password again in the ‘Confirm New Password’ box and tap submit.

The student should be able to login with the new password they created.
